PREMIUM STONE-COATED METAL ROOFING

GRANITE RIDGE

STEEL SHINGLES

Beautiful &

WHY METAL SHINGLES

The metal shingle business is thriving and experiencing immense growth. Its popularity is due to the shingle's superior durability combined with its architectural style and aesthetic appeal.

Many homeowners are choosing to re-roof with Allmet's interlocking stone-coated steel roofing systems. Unlike other roofing systems that prematurely fail, Allmet's metal shingle will not deteriorate as a result of seasonal changes. Our interlocking steel roofing panels withstand the tests of time, no cracking, curling or breaking under even the most extreme conditions.

Stone-coated steel roofs are the economical roof of choice for homeowners. For years consumers have been limited to a selection of asphalt shingles that deliver aesthetics but are often short-lived. With Allmet, homeowners have a choice.

According to the Metal Roofing Associations' 2006 Residential Cost Handbook, home values increase \$1.35 per square foot with metal roofs as opposed to against wood shake or asphalt composition roofs. The likely increase in your property value can prove beneficial when refinancing or selling your home.

- **120 MPH Wind Warranty**
- **2.5" Hail Stone Warranty**
- **Class A Fire Rating**
- **Lightweight**
- **Improved Efficiency**
- **Increases Home Value**
- **Lifetime Beauty**
- **Environmentally Friendly**
- **Lowest Life Cycle Cost**
- **Possible Insurance Discounts**

Dependable, for Life!

THE FINAL ROOFING SYSTEM

Allmet has over 30 years' experience in the roofing industry and distributes its products worldwide.

Our roofing systems are designed to be the perfect roofing solution and the last roof you will ever need for your home. Allmet stone-coated steel roofing systems help to protect against extreme weather conditions, such as fires and fierce winds, without sacrificing the architectural looks and beauty.

Stone-coated steel roofing panels add the benefits of safety and durability. Your Allmet roof will prove to be a long-lasting, virtually maintenance free addition to your home.

Will Never Crack or Break

Impact and weather tested, an Allmet roof will provide long-lasting security and protection from hail, snow, wind and fire. In most cases, an Allmet roof may reduce your insurance premiums - please ask your insurance agent for more details.

The Best Warranty

Allmet delivers the best roofing warranty in the business! By choosing Allmet, you are choosing the most time tested roofing system available. With the best transferable warranty in the business, chances are others, namely the future homeowner, will also benefit from your smart decision.

Superior Protection

WARRANTY FEATURES

Wind. Allmet's stone-coated metal roofing systems have been independently evaluated and tested, surpassing industry standards for high-velocity winds and wind-driven rain. Unlike other manufacturers that only offer wind warranties for a limited time, or not at all, our 120 MPH Wind Warranty is good for life.

Hail & Ice. Through careful research and testing, we have developed 26-gauge steel panels that will stand up to a beating! Our **Class 4** impact rating and 2.5" hail stone warranty will allow you and your insurance company to rest easily. Allmet's installation methods also offer superior protection against snow and ice damming.

Fire. Allmet's noncombustible steel shingles keep fire at bay. The interlocking design of our roofing systems repel dangerous wind-blown embers and our lightweight system reduces the risk of roof collapse. In the city or country, our **Class A** fire-rated roofing system will keep you safe. Visit us online to read our customers true fire-related stories.

Guaranteed.

ALLMET'S ECO-COMMITMENT

We offer one of the most environmentally friendly roofing systems in the world and are committed to sustainable business practices.

- Allmet is made with over 30% recycled steel
- Steel is 100% recyclable
- Our steel suppliers have recycling facilities on site
- We recycle over 90% of our production waste
- California Title 24 compliant
- Allmet roofing products can help qualify for LEED points
- Our packaging is purchased from vendors who recycle

NATURAL STONE-COATED FINISHES

Granite Ridge Shingle™ Color Selections

Choose from six perfectly blended colors to enhance the look of your home. Allmet's stone coatings are a unique blend of highly UV-Reflective earth stone granules designed to provide the natural hues and beauty of traditional roofing.

Heather Blend

Onyx

Desert Sand

Forest Green

Depending on the levels of outdoor light, our granite stone chip coatings will naturally reflect varying levels of light and color intensity. These color samples were photographed on an automatic setting in mid-afternoon sunlight from approximately three feet away.

GRANITE RIDGE PROFILE

26-GAUGE GALVALUME® STEEL

the Rest.

LIGHTWEIGHT

Allmet's roofing systems offer the freedom of choosing a product that fits your aesthetic wants without sacrificing performance. Allmet's roofing systems only weigh 1.4 pounds per square foot (psf) whereas the average asphalt shingle is between 3-4 psf.

INSTALLATION

Allmet's stone-coated metal shingle direct-to-deck roofing system is installed using hidden fasteners in an interlocking design. Our comprehensive line of perfectly matched trim, vents and accessories allows for maximum flexibility and a fully finished look that will deliver more than a lifetime of value and appeal.

The Last Roof You'll

ALLMET GRANITE RIDGE

Allmet's steel shingles are stamped from 26-gauge Galvalume[®] steel. Far more durable and better value than traditional asphalt roofing products, our shingles have a 120 MPH wind warranty, making them one of the most enduring roofing products available today.

Beautiful crushed stone chips are applied with non-petroleum-based resins for lifetime adhesion, making an Allmet roof truly last forever.

Ever Need!

TESTIMONIALS

"Although we sustained considerable damage, I am very happy to inform you that no one was hurt and our Allmet roof is completely intact with not so much as a loose shingle. You said it would hold up in a tornado. I'm writing to tell you it will!"

Bill and Carol J.

"The new roof has provided a definite improvement to the overall look of our house. There is no obvious metal look to the roof and we are really enjoying the smartened appearance."

Jack A.
